

LA PALOMA PROPERTY OWNERS ASSOCIATION
DESIGN REVIEW
PLANT LIST

Attached is the plant list for the La Paloma Property Owners Association. This is a detailed list with plants that can be grown with moderate to no supplemental irrigation once established.

Before determining your plant palate for your yard, please check to make certain your plant material selected meets the aesthetic and functional requirements that are needed for the location of its installation. For example: Plants used for screening may need to be a type of evergreen, and have dense foliage, and grow to required heights. On the other hand, plants used within sight visibility triangles may have height restrictions.

Throughout all of La Paloma there are three categories of landscaping areas that can occur:

1. **Transitional Landscaping** is the area between the street and the front and side yards of the home (with the exception of Single Family Custom home sites, which specifically state the Transitional Landscape areas). Single Family Custom homes should refer to their building plans to locate the Transitional Landscaped area.
2. **Ornamental Landscaping** can only occur inside the enclosed yard. Subject to certain restrictions, the landscaping behind yard/patio walls can include exotic plants unless on the prohibited plant list.
3. **Desert Restoration:** Desert Restoration is required if the native vegetation within the undisturbed open space is inadvertently destroyed or removed.

Note: Desert Restoration plants may be used in the transitional and ornamental areas. Transitional plants may be used in the Ornamental areas.

In addition to the cacti on the list, any cacti salvaged and tagged in compliance with the State of Arizona agricultural and horticultural regulations may be used.

Below is a key to the symbols on the list:

A	Accent Plants	*	Allergen or Toxic – may be harmful if eaten
C	Cactus	I	Invasive
Gc	Ground Cover	(sh)	Semi-hardy – some die back in a hard frost
S	Shrub	(t)	Tender – severely damaged or killed in hard frost
Sc	Succulent (other than cactus)	an	Annual
T	Tree	p	Perennial
V	Vine	cl	Seasonal Color (showy flowers, fall color or berries)

Approximate water needs are listed below:

- 1 No supplemental irrigation once established
- 2 Once a month during the growing season once established
- 3 Twice a month during the growing season once established
- 4 Once a week during the growing season once established

Occasionally for good appearance, supplemental irrigation may be applied during the growing season to all of these categories.

263	Vine	V, cl	SD	Merremia aurea	Yellow Merrenia (Yellow Morning Glory)	2-3 (t)	
264	Vine	V, S, cl	SD	Bougainvillea spp.	Bougainvillea	3 (t)	

PROHIBITED PLANT MATERIALS LIST

The objective of the Prohibited Plant Materials List is to preserve and protect the Sonoran Foothills landscape, in particular La Paloma, and to minimize allergy-producing pollen. The following are prohibited:

1. Any species of tree or shrub whose mature height may reasonably be expected to exceed 16 feet, with the exception of those on the Natural Landscaping Materials Schedule (Appendix 5) or the Desert Restoration Plant Material Schedule (Appendix 4) or those indigenous to the Sonoran Desert foothills which may naturally exceed 16 feet. Examples (non-inclusive) – Cottonwood, Eucalyptus, Pine, etc.
2. Any species of palm tree whose mature height may exceed 16 feet. The only exceptions are the Mediterranean Fan Palm and the Sago Palm, which may be installed in ornamental areas.
3. Olive trees (*Olea europaea*) will be prohibited for reasons of their profuse production of allergy producing pollen.
4. Oleanders (*Nerium oleander*) will be prohibited because of their profuse production and collection of allergy producing pollen.
5. Fountain Grass (*Pennisetum setaceum*) will be prohibited as a defined weed with the potential to spread throughout the development, and also as a fire hazard.
6. Common Bermuda Grass (*Cynodon dactylon*) will be prohibited as a defined weed and for its profuse production of allergy producing pollen.
7. Mineral landscape features, such as ground covers and boulders, will be limited to materials indigenous to the Santa Catalina Foothills / Tucson Basin. Salt River rock is prohibited.
8. Mulberries (*Morus*) will be prohibited as a noxious pollen producer.

9. Desert Broom will be prohibited due to the potential for it to spread uncontrollably throughout the development.
